Currently surveillance video storage overwrites 4-6 days, with the upgrade we should have around a month's worth of storage before overwriting occurs. The parts are not proprietary, although it needs to be configured into their system. which is propriety software. If another vendor is selected, they would only be able to physically install the devices, we would still need EO Integrated come here and configure the devices and then be billed for their services. 7. Explain in detail, the process that will be or was utilized in selecting the vendor/contractor/service provider: | | |

| Back in 2005, EO Integrated is the original vendor that installed our se software. Although parts to upgrade the security surveillance system vendor physically install the parts because EO Integrated would still head to additional cost for their services. | are not propriety, it is not practical to have another | |
